EXP.NO:4	Data Modelling and Form Design

Aim

To design the data model and create forms for the Library Book Issue Management System using Zoho Creator.

Procedure:

1. Logged in to the Zoho Creator account.

2. Opened the Library Book Issue Management System application.

3. Created a Book Issue Request form using the drag-and-drop form builder.

4. Added fields such as Member Name, Email Address, Contact Number, Register RollNumber,Hostel/Residential Address, Purpose of Borrowing, Number of Copies, Preferred Issue Date, Preferred Collection Time, Book Category, Member Type, and Subject Areas of Interest.

5. Added additional fields such as Home Delivery Requirement, E-book Reference URL, Book Cover Image, Fine Amount Due, Book Replacement Price, and Additional Books Requested, wherever required.

6. Saved the Book Issue Request form and verified that all the fields were displayed correctly.

7. Configured the required field properties and validation rules to ensure that the entered information was valid.

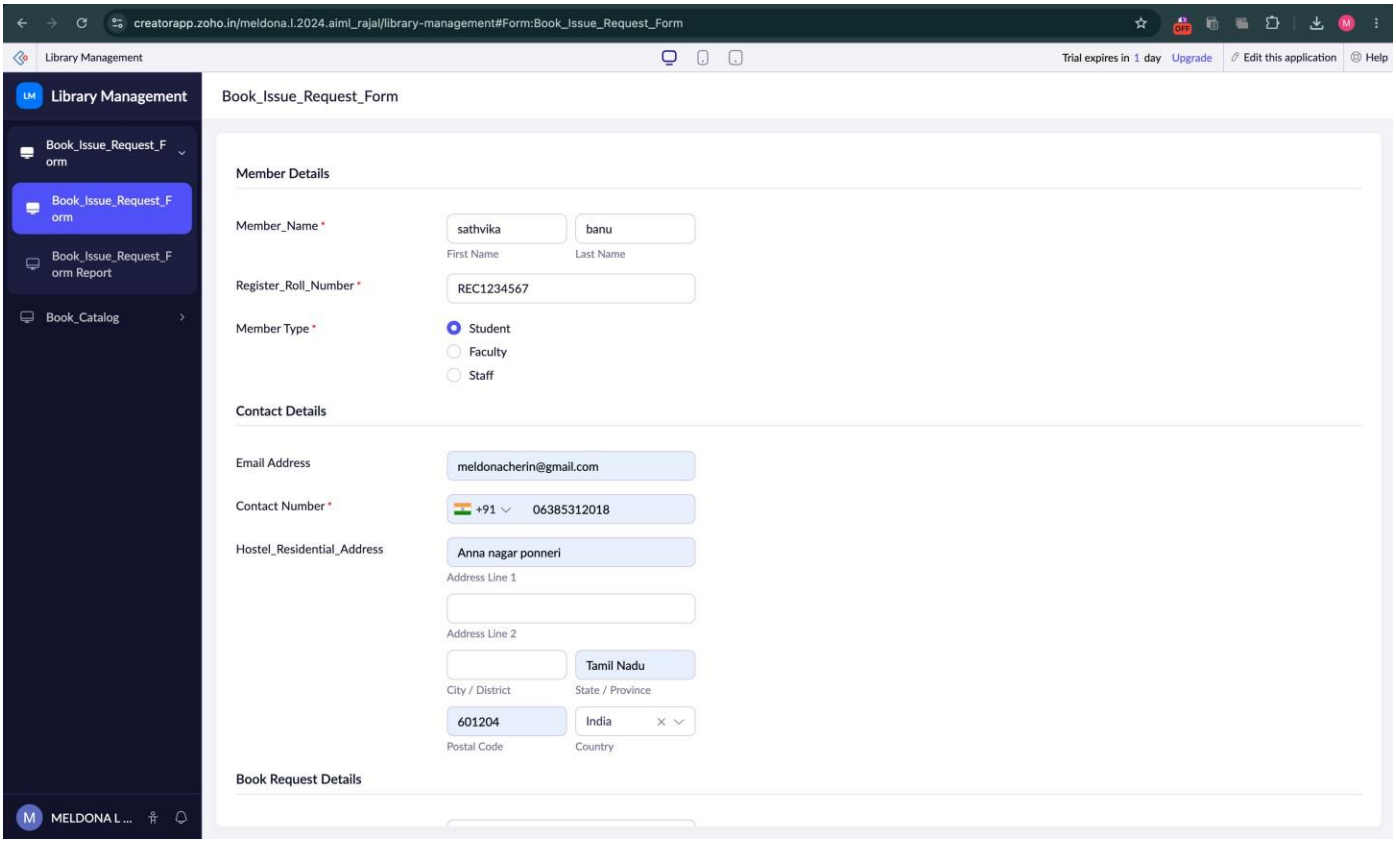

8. Created a Book Issue Request Report to view and manage the submitted book issue requests.

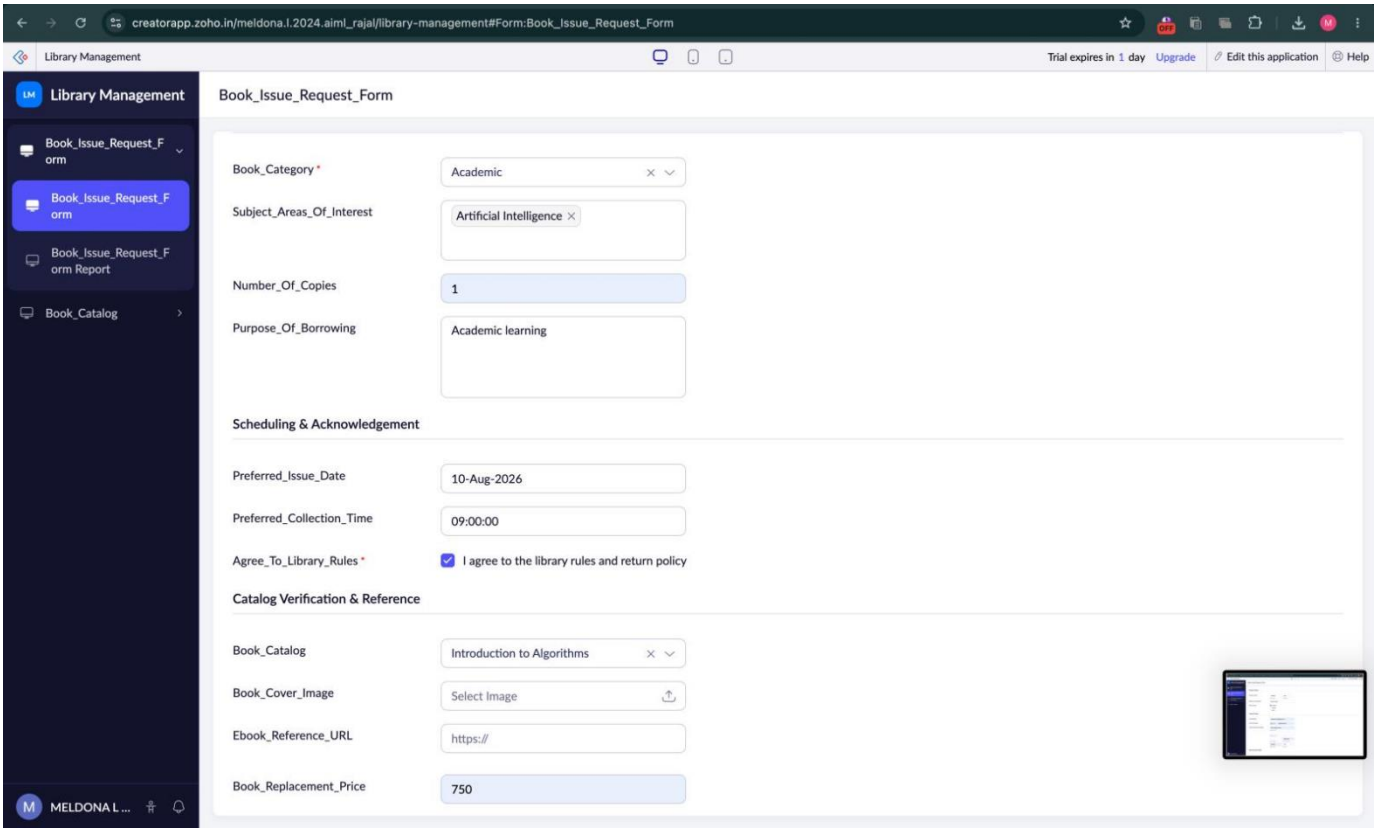

9. Configured the report to display relevant details, including member information, book category, number of copies, and other request details.

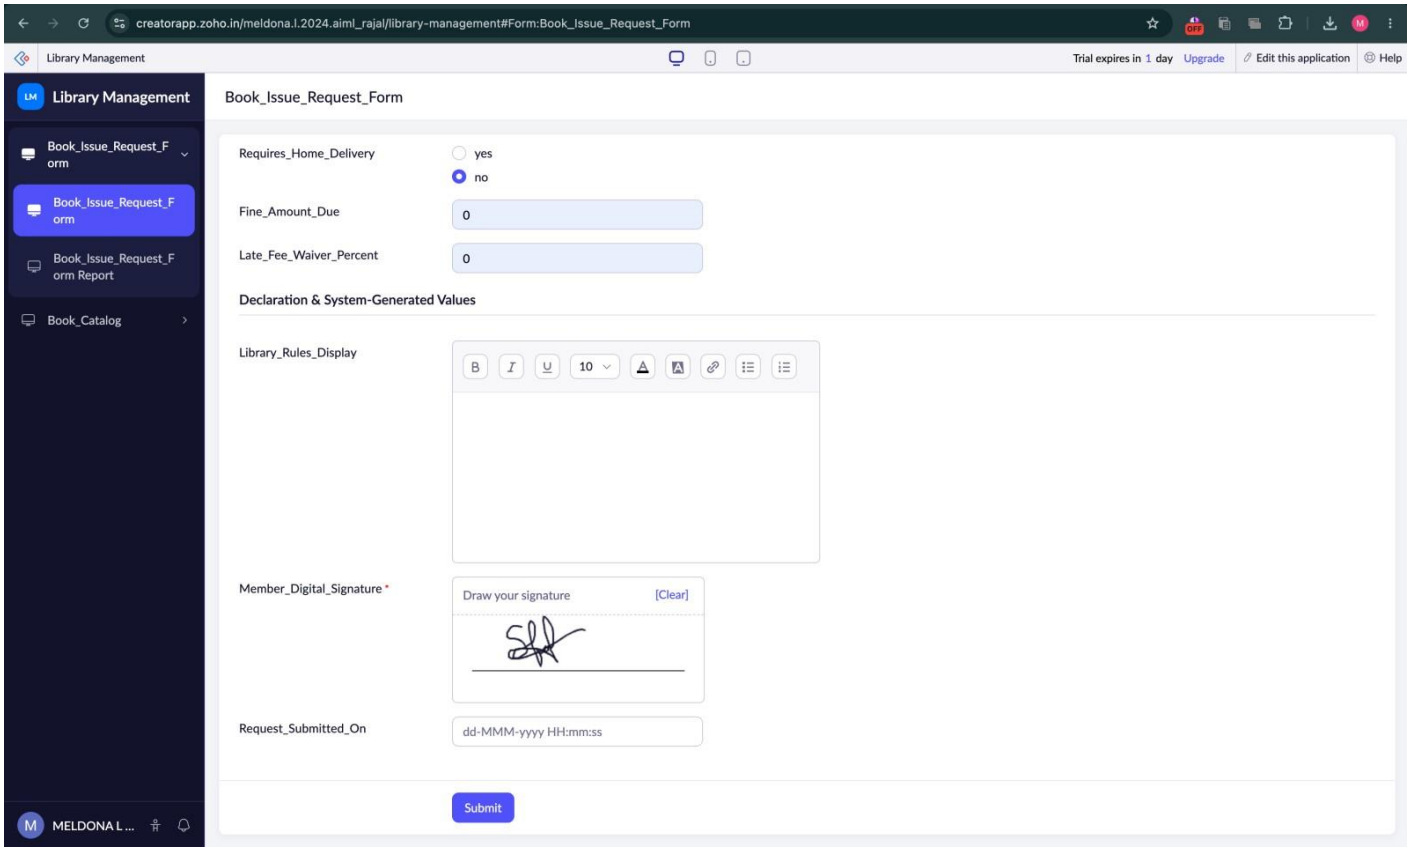

10. Tested the form by entering sample book issue request data.

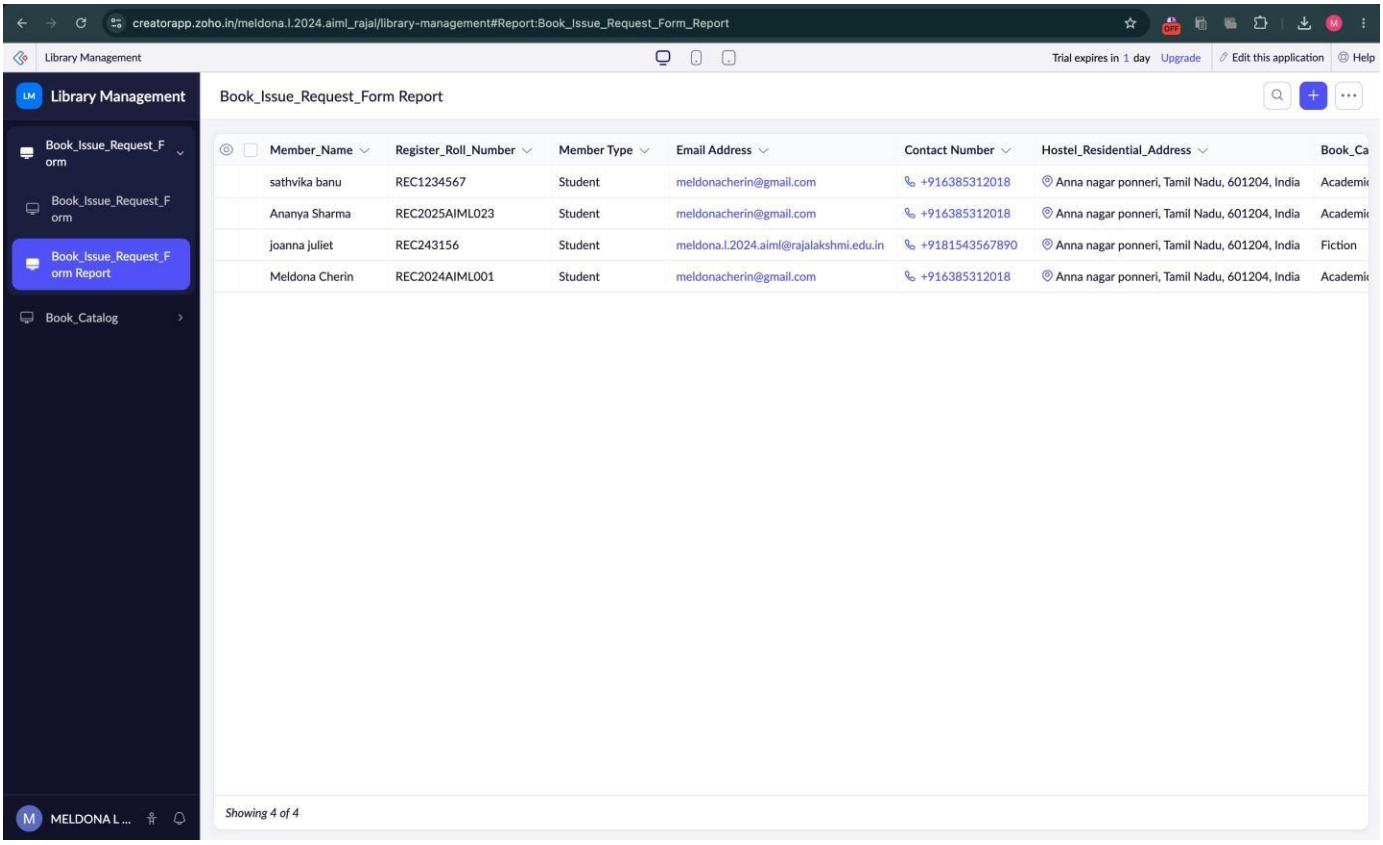

11. Verified that the submitted data was stored successfully and displayed correctly in the report.

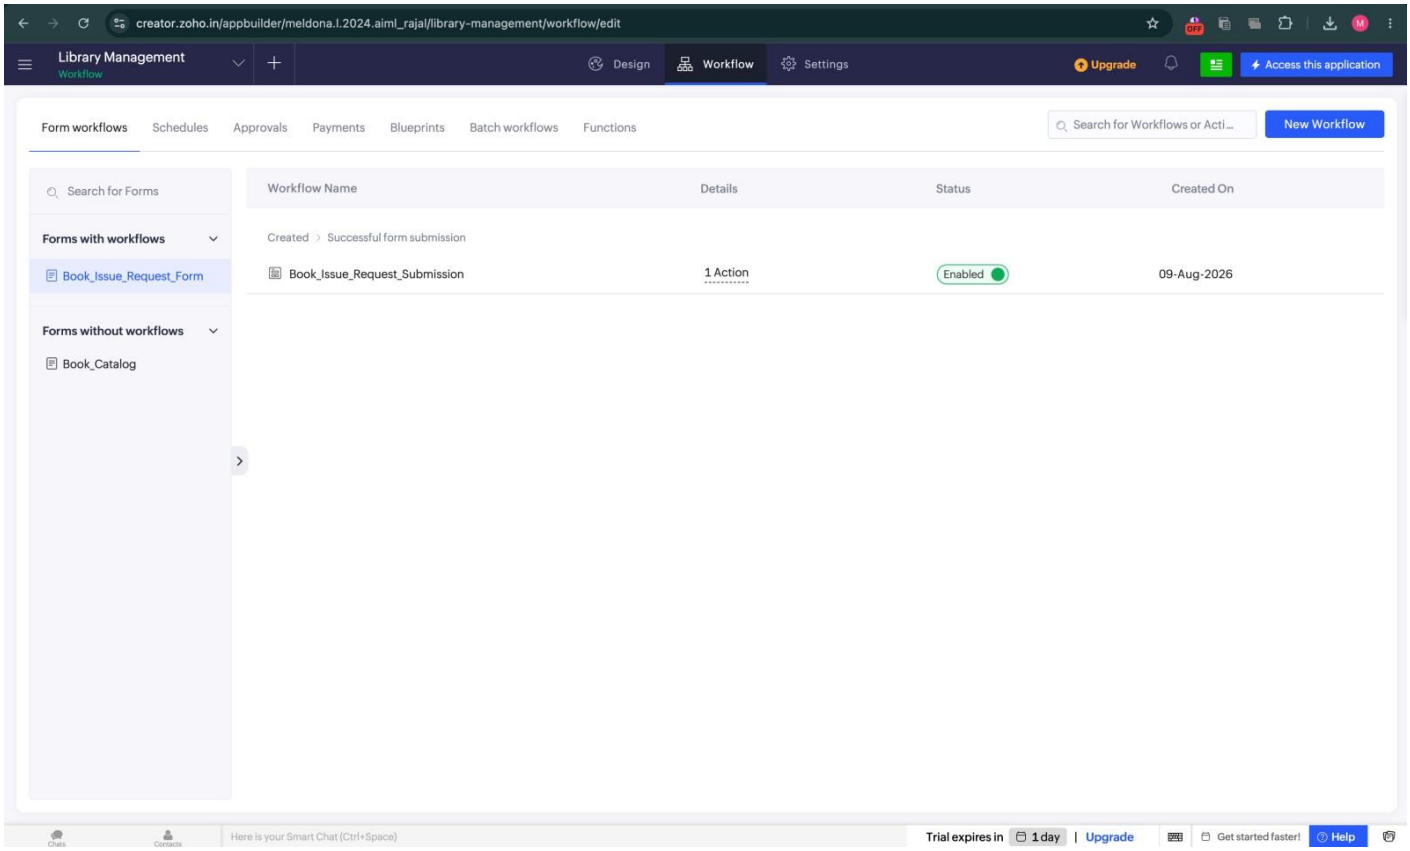

12. Saved the application and confirmed the successful creation of the form and report for the Library Book Issue Management System.

Conclusion

The experiment demonstrated how Zoho Creator simplifies data modelling and form design using its visual interface.
