EXPERIMENT 5

REPORTS, DASHBOARDS, AND UI BUILDER

AIM:

To create different types of reports and design a command center page in Zoho Creator for the Library Book Issue Management application, enabling efficient monitoring, searching, and management of book issue requests.

SOFTWARE REQUIRED:

- Zoho Creator
- Web Browser (Google Chrome or Safari)
- Library Book Issue Management application

OBJECTIVES:

- To create and explore different types of reports in Zoho Creator.
- To display library book issue request information in different formats.
- To visualize issue status and book category popularity.
- To design a centralized command center page using Page Builder elements.
- To improve the monitoring and management of library operations.

PROCEDURE:

Step 1: Open the Application

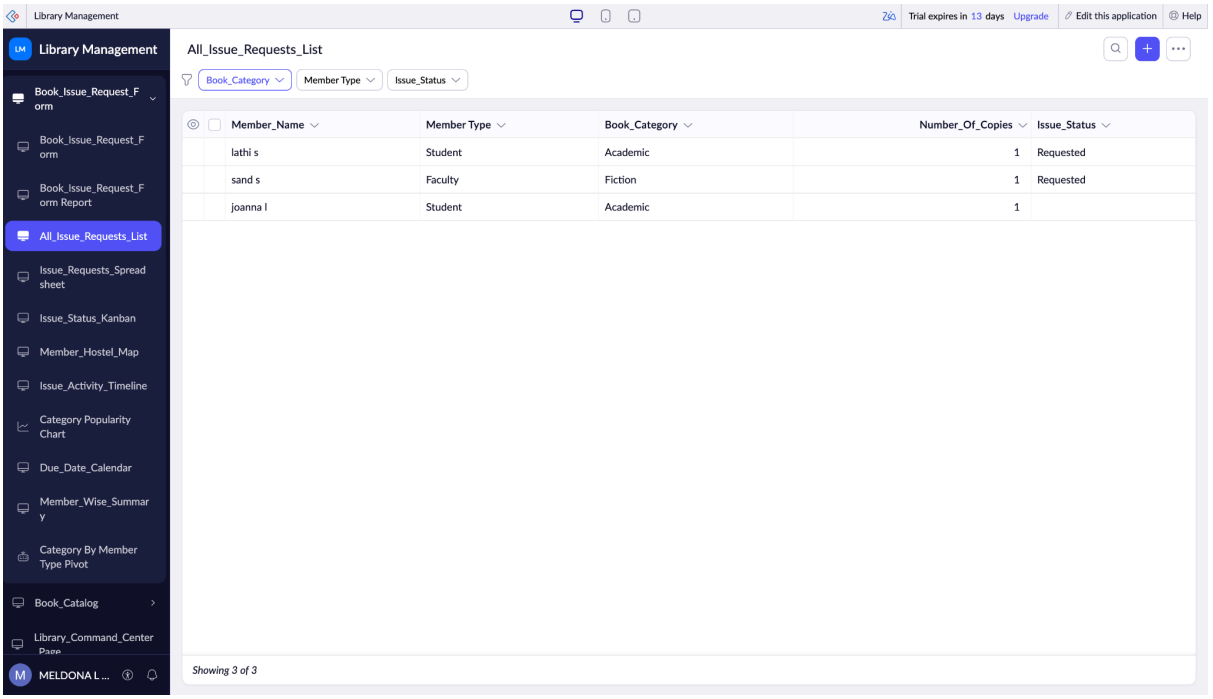

Log in to Zoho Creator and open the Library Book Issue Management application.

Step 2: Create Reports

Use the existing Book Issue Request form and its data to create the following reports.

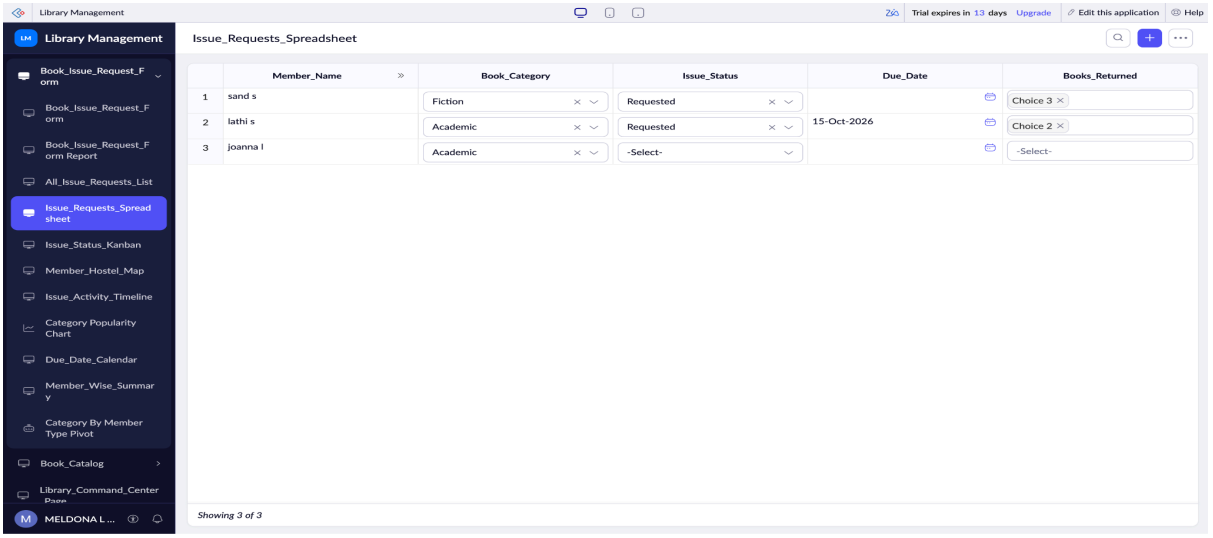

Report 1: List Report

Report Name: All_Issue_Requests_ListA List Report displays book issue request records in a structured list format. It helps library staff view and identify individual requests easily.

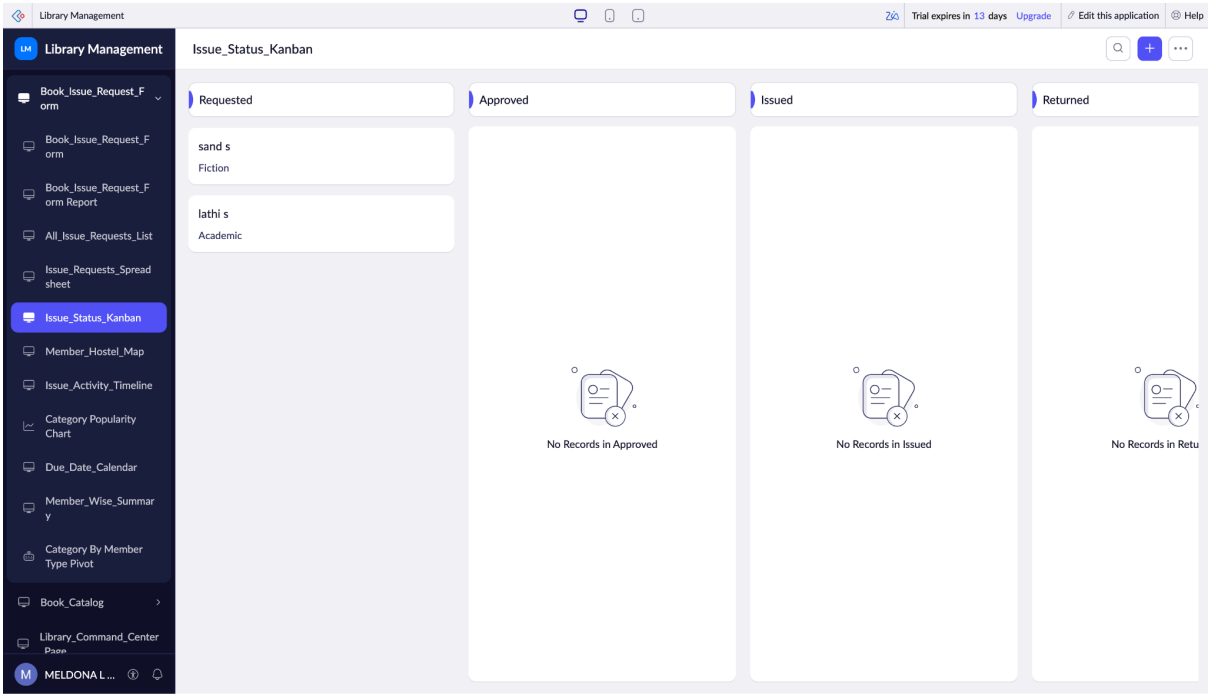

Report 2: Spreadsheet Report

A Spreadsheet Report displays records in rows and columns. It helps users view and compare multiple book issue requests in a tabular format.

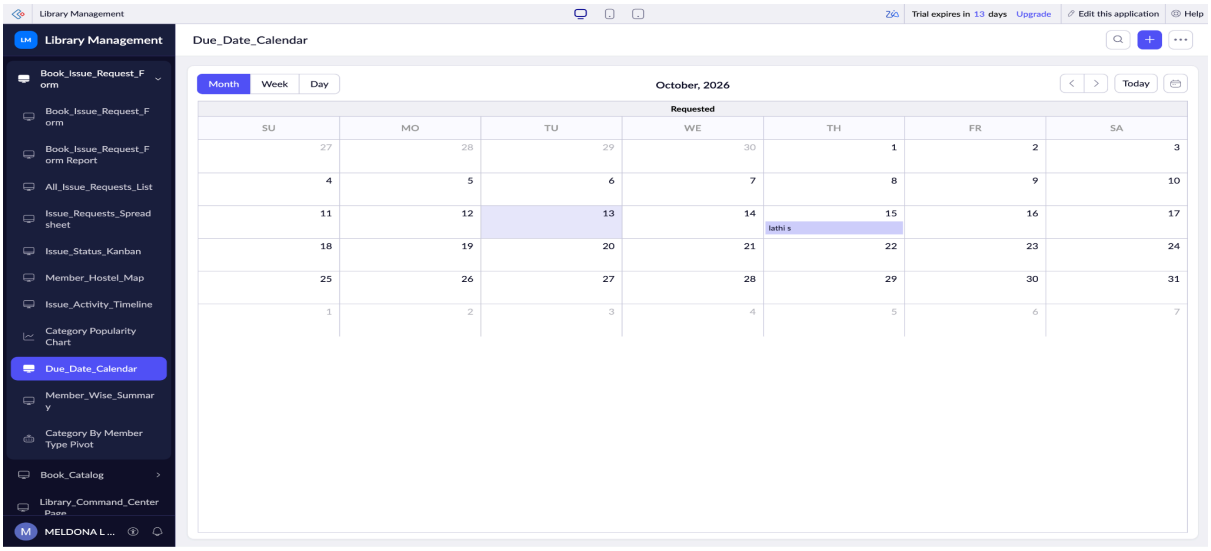

Report 3: Kanban Report

A Kanban Report displays records as cards grouped according to their status. It helps staff track requests through different stages of the issue process.

Report 4: Calendar Report

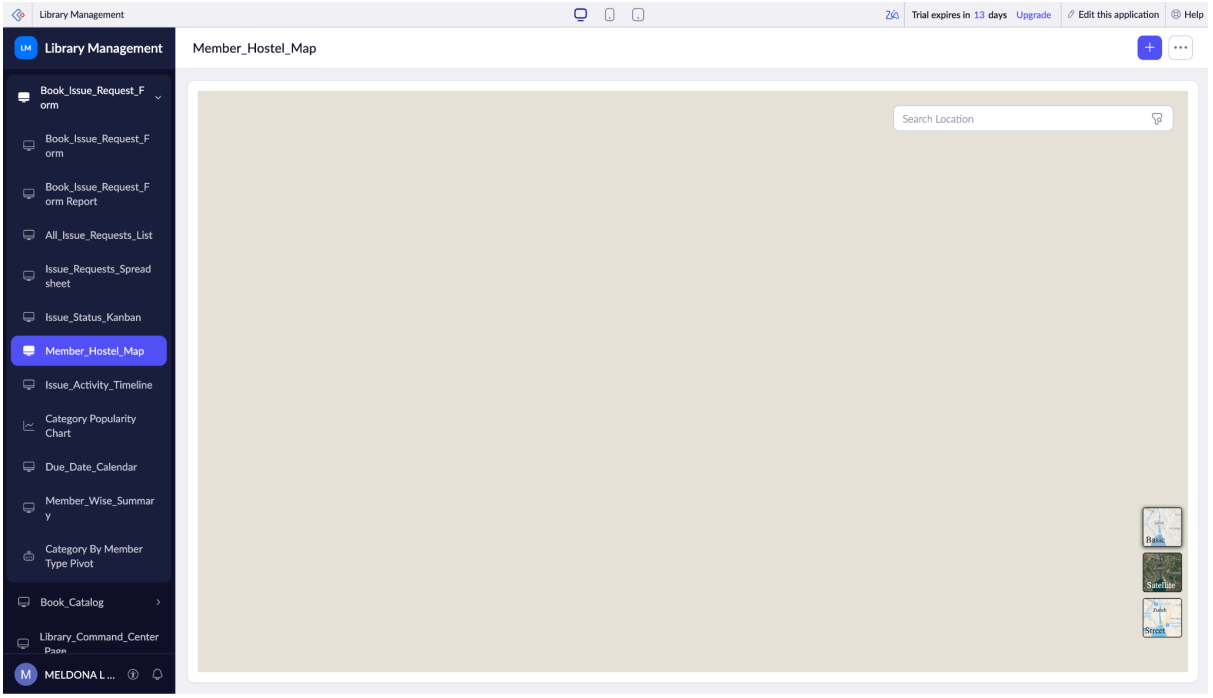

A Calendar Report displays records according to their associated dates. It helps library staff monitor issue dates, due dates, and other scheduled activities.

.

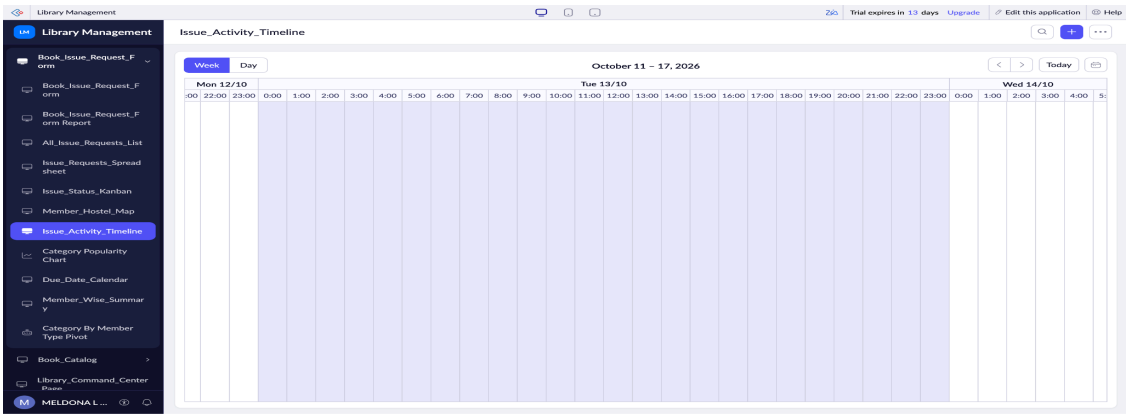

Report 5: Map Report

A Map Report displays records geographically when suitable location fields are available. It helps visualize location-related information.

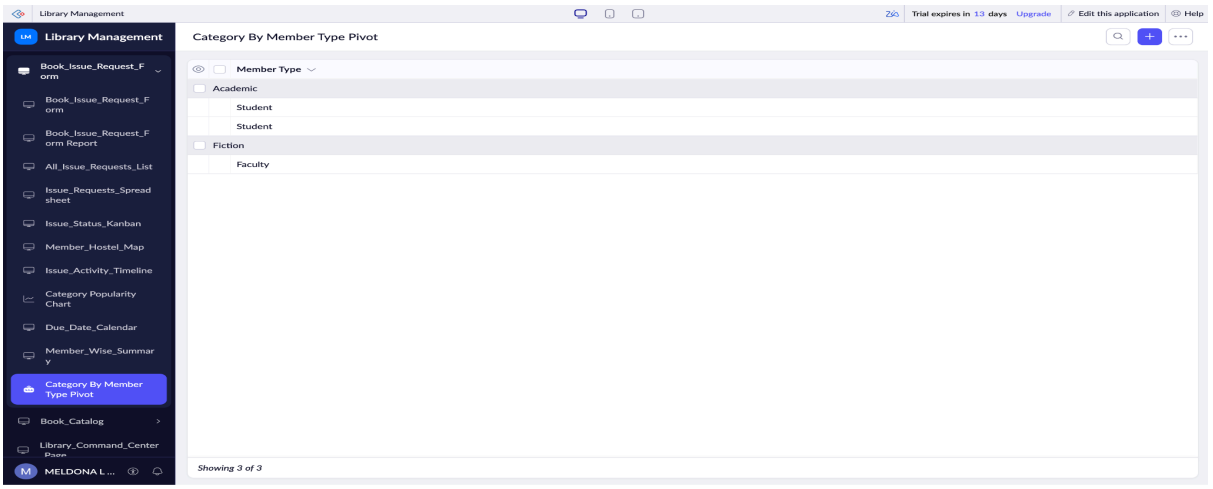

Report 6: Timeline Report

A Timeline Report displays records or activities along a time-based view. It helps users understand the sequence and timing of library operations.

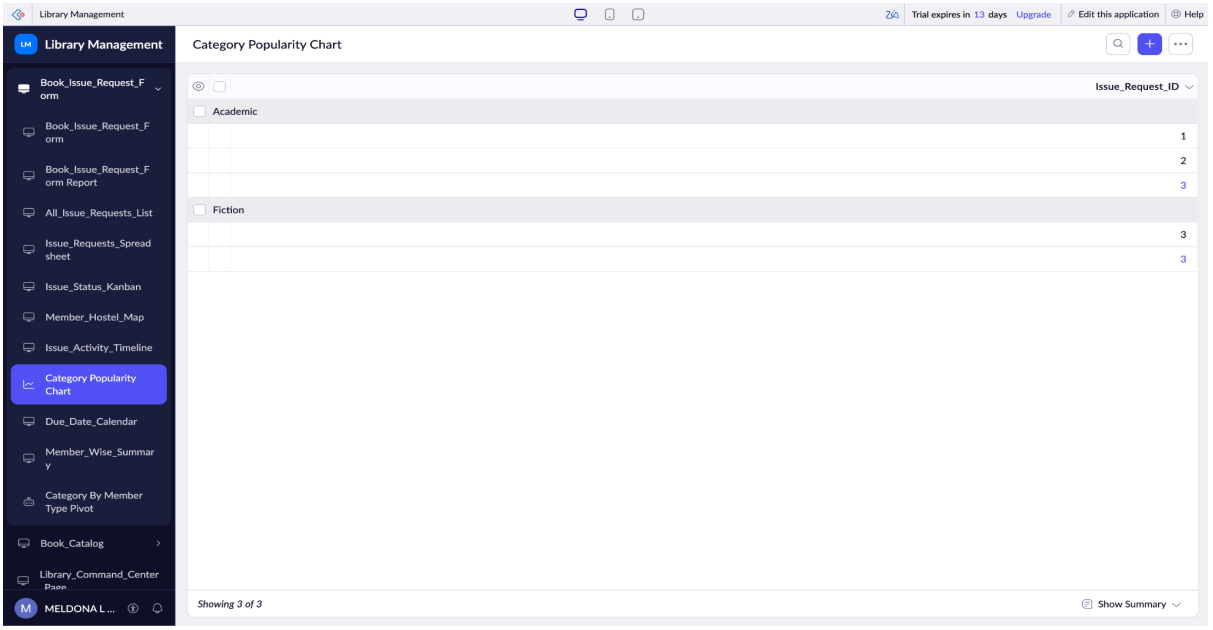

Report 7: Pivot Table Report

A Pivot Table Report summarizes and organizes data by grouping records using selected fields. It helps analyze library data and compare values across categories.

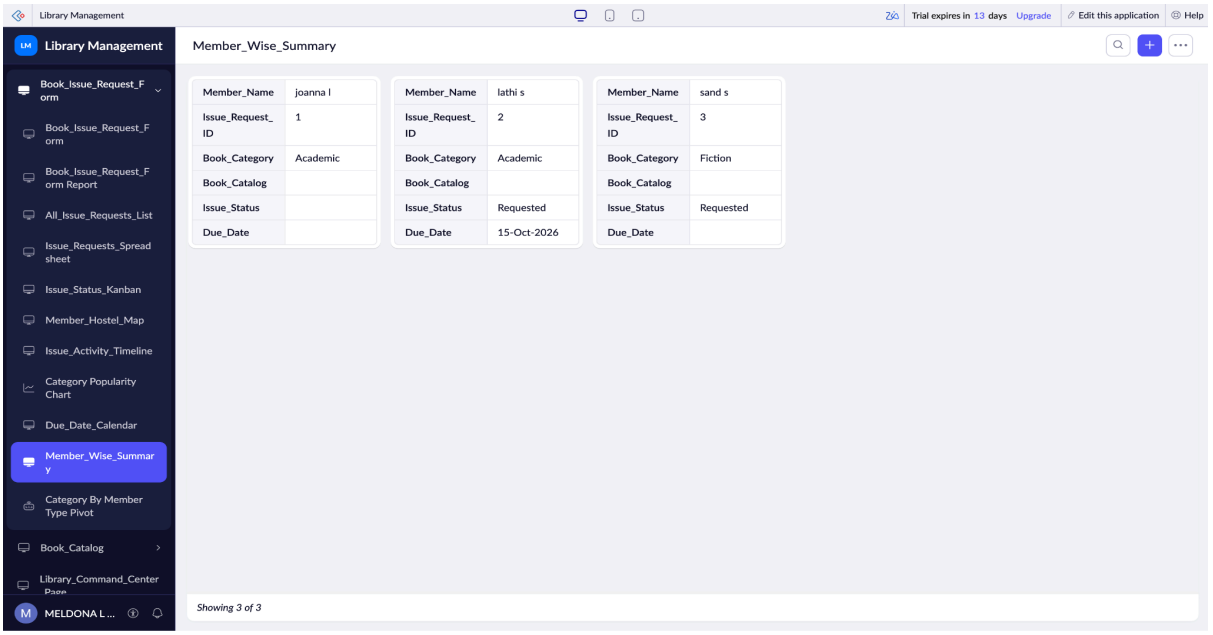

Report 8: Chart Report

A Chart Report presents data graphically using charts such as bar charts or column charts. It helps identify patterns and compare book issue counts across categories.

Report 9: Summary View

A Summary View presents important information and summarized values from records. It helps library staff understand the overall status of book issue requests quickly.

DESIGNING THE COMMAND CENTER PAGE

Step 1: Create a Page

Open the Page Builder in Zoho Creator and create a new internal page.

Page Name: Library_Command_Center_Page

The page acts as a centralized interface for monitoring, searching, and processing library book issue requests.

Step 2: Add the Panel

Element Name: Command_Center_Main_Panel

The Panel serves as the main container for organizing the elements of the command center page.

.

Step 3: Add the Board

Element Name: Issue_Status_Board

The Board displays issue requests in a Kanban-style layout with the following statuses:

- Requested
- Approved
- Issued
- Returned
- Overdue

It helps staff monitor the progress of each book issue request.

Step 4: Add the Chart

Element Name: Category_Popularity_Chart_Widget

The Chart displays the number of book issues by category using a bar chart. It helps identify popular book categories.

Step 5: Add the Gauge

Element Name: Monthly_Circulation_Target_Gauge

The Gauge displays progress toward the monthly book circulation target. It provides a visual indication of circulation performance.

Step 6: Add the Search Element

Element Name: Book_Member_Search_Bar

The Search element helps users find book and member information using available fields such as Book Title, Member Name, and Register/Roll Number.

Step 7: Add the Form

Element Name: Quick_Counter_Issue_Form

Embed the Book_Issue_Request_Form to allow staff to enter or submit book issue requests directly from the command center page.

Step 8: Add the Report

Element Name: Full_Issue_Requests_Report

Embed the Book_Issue_Request_Report to display issue request records directly on the command center page

Step 9: Add Snippets

Element Name: Library_Rules_Return_Policy_Snippet

The Snippets element displays important library rules and return policies for quick reference by library staff and users.

Step 10: Add the Button

Element Name: Send_Overdue_Reminder_Button

The Button provides an interface for initiating the overdue reminder action according to the configured application workflow.

Step 11: Add Widgets

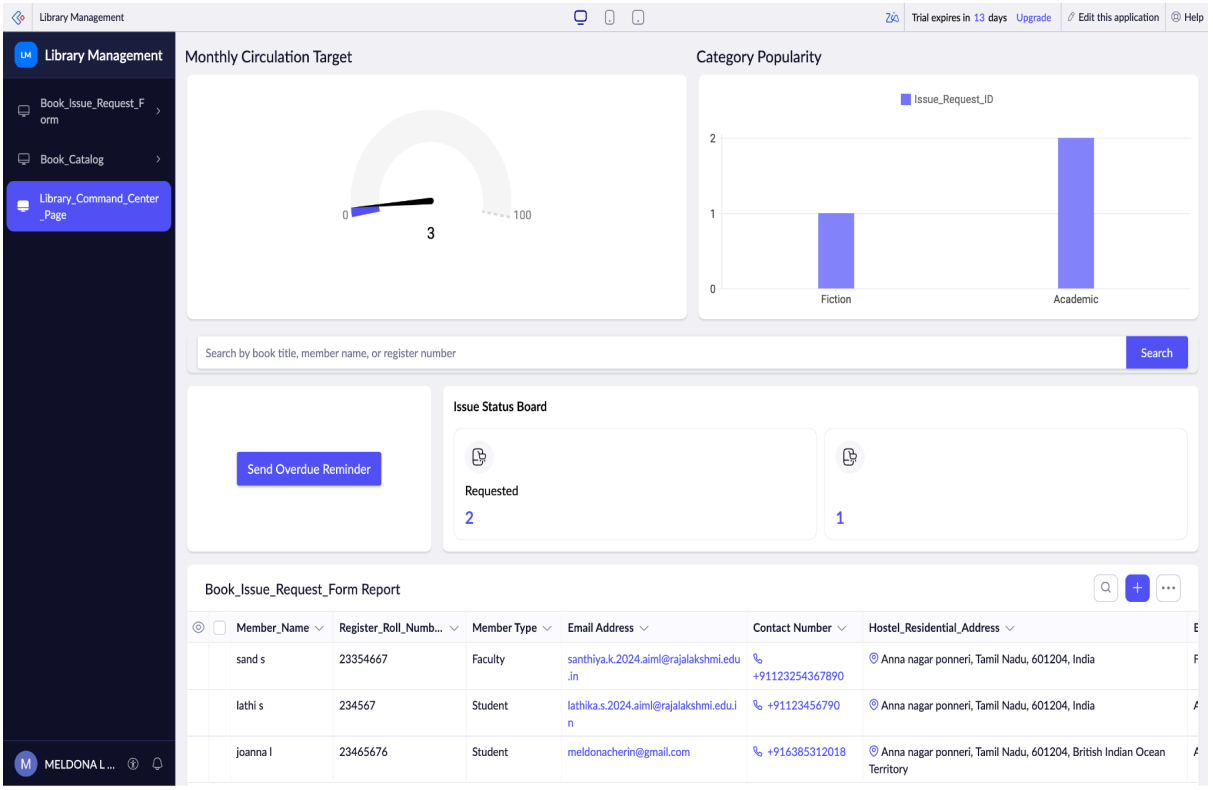

Element Name: NewArrivals_And_ReadingRoom_Widgets

The Widgets section provides information about new arrivals and reading room facilities, helping users access useful library information.

Step 12: Add the Viewer

Element Name: Recommendation_Letter_Viewer

The Viewer displays the recommendation letter or related document within the command center page when the appropriate document is available.

RESULT:

The different report formats and the Library Command Center Page were designed in Zoho Creator for the Library Book Issue Management application.
